#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong (3,891,003) in view of Desrosier.

Armstrong discloses confectioner's sugar in example 3 that is made by grinding cane sugar, feeding it into an agglomerating chamber along with a solution of invert sugar and water and then agglomerating the mixture at 170F. Then the agglomerated product is sifted over a mesh wire to size the product. The claims appear to differ from Armstrong in the recitation of the use of corn syrup as the liquid sugar. The moisture content of the product is shown at column 9, line 66. The mesh size is shown in the Table in column 10.

Desrosier provides a list of commercially available sweeteners at page 549. Although corn syrup may contain a variety of sweetener compounds, it is well known in the art that simple sugars can predominate corn syrup compositions as shown in Table 17.1. It would have been obvious to one of ordinary skill in the art to

substitute corn syrup of Desrosier as a source of liquid sugar as an obvious sweetening alternative for the invert sugar of Armstrong. It is appreciated that the concentration of liquid sugar added to the cane sugar is not mentioned but no unobvious or unexpected result is seen from the use of this particular concentration of sugars.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art further shows the state of the art relating to the preparation of sugar compounds.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano, can be reached on (571) 272-1398 or by dialing 571-272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
